Dear Mr. Dunn:

Re: Disposal of Asbestos Pipe
Insulation from
Wabash Paper Coating
Wabash, Indiana

This letter acknowledges the request for disposal dated September 10, 1985, from Mr. Lance Eckman, Asbestos Removal, Inc., Wabash, Indiana.

Approval is hereby granted for disposal of 55, fifty-five gallon bags, one time only, of asbestos pipe insulation at the Spring Valley Landfill, OPP. No. 85-2, Wabash County. The waste is to be mixed with solid waste and covered with a minimum of six inches of cover soil or solid waste immediately.

The approval is granted subject to the following conditions:

1. The generator and/or hauler must contact you to notify you of the time of disposal and conditions of shipment.
2. Appropriate protective clothing should be used during handling and disposal to ensure proper protection from exposure to the material, especially from inhalation.
3. All asbestos must be sufficiently dampened to prevent airborne contamination during compaction and bagged in 6 mil plastic bags.
4. Bags should be labeled with a proper warning label stating: Caution--Contains Asbestos--Avoid Opening or Breaking Container. Breathing Asbestos is Hazardous To Your Health.
5. If nuisance or pollution conditions are created, immediate corrective action will be taken by the operator.
6. Waste material accepted under this approval shall be included on the Special Waste Monthly Report to be submitted to this office monthly.
7. This approval will expire December 31, 1985.

This approval will be revoked if the landfill fails to maintain compliance with 330 IAC 4-1, et seq. (Regulation SPC-18). Any necessary local approval must be obtained, but is not required for this approval to be valid.

If you have any questions, please contact Ms. Rosemary Cantwell of the Solid Waste Management Branch at AC 317/243-5154.

Very truly yours,

Ralph C. Pickard
Technical Secretary
